

Sferis

Design Federico de Majo

Lampada a sospensione con diffusore in vetro opale triplex satinato soffiato a bocca, disponibile in cinque dimensioni.

Le varianti da 25, 30, 40 e 50 cm di diametro sono state ridisegnate con una calotta in policarbonato opale, che semplifica la linea del diffusore rendendola più minimale e raffinata, e che garantisce una diffusione della luce a 360°.

La lampada è studiata anche per uso modulare. Adatta esclusivamente a uso interno.

Pendant with diffuser in mouth-blown satin-finish triplex opal glass, available in five different sizes.

The versions with diameter 25, 30, 40 and 50 cm have been redesigned with an opal polycarbonate cover, which makes the line of the diffuser more refined and minimalist, and ensures 360-degree light diffusion.

The lamp is also designed for modular use. Suitable for indoor use only.
