

Caboche Plus, soffitto

by Patricia Urquiola , Eliana Gerotto

FOSCARINI

DESCRIPTION

Caboche was created in 2005 as a result of the desire to create a precious and charming lamp like a pearl bracelet, accommodated with a focus on light weight and transparency. Rich, bright and sophisticated, it was a success from the onset, becoming one of Foscarini's biggest bestsellers, and went on to become a genuine icon of designer lighting. It is now presented in the Plus version, with a new LED which guarantees a more intense light yet without creating glare. Total transparency wins in Caboche Plus, as your eyes roam through the entire lamp thanks to the new zigzagging arches which do not shield the light. What's more, the new attachment system, which is even simpler and more user-friendly, guarantees greater stability for the sphere and makes it simply to use.

MATERIALS

PMMA, steel and liquid coated aluminium

technical details

FOSCARINI

Ceiling lamp with diffused light. Structure comprising transparent PC arches, onto which a series of PMMA spheres are applied, using the new twist lock system. The lamp body consists of a powder coated steel structure, which incorporate the LED board, designed specifically by Foscarini, thereby obtaining a superior level of colour rendering (CRI) and retaining the same colour temperature as a halogen light source (degrees Kelvin). Satin-finish PMMA diffuser
